Speech to Text

Now you can ***read your Voicemail*** on the Avaya IP Office using newly available software (gisTT). This software program converts speech to text and delivers the text version of the voice message to your email inbox. This allows you to read or listen to your messages so you can respond faster. These text messages can also be delivered via SMS or Instant Message for an even faster response. Voicemail to Text enables you to be more responsive in today's competitive business environment

Compatible with:

- Avaya Voice Messaging
- Tidal tNet Hosted Service

Benefits:

■ **Rapid ROI:**
Significantly reduces time spent managing voicemail.

■ **Flexible:**
Works with virtually any email system and any Internet-enabled device.

■ **Efficient:**
Converted messages can be saved, forwarded, or appended just like email. No more jotting down notes and phone numbers!

■ **Responsive:**
Instant call back with a touch on your Smartphone.

■ **ADA Compliance:** Provides hearing impaired employees with equal access to voicemail.
