
Analog Trunk Replacement

The New Standard:

With the emergence of low-cost broadband and VoIP-enabled data networks, SIP Trunking is rapidly becoming the standard for interconnecting premise-based phone systems to the public switched telephone network (PSTN). Tidal Communications SIP Trunks and Analog/Plain Old Telephone Lines (POTs) replacement products enables you to reduce phone and broadband charges by consolidating them into one affordable competitive

Affordability and Cost Savings:

With SIP Trunking, you can seamlessly and affordably transition to a cloud-based voice service without having to replace your existing legacy telephones or fax machines. This enables you to retain your investment in equipment while realizing the cost benefits of consolidating your voice and data services. In addition, your company can take advantage of the competitive packages, long distance, and toll charges offered by our Analog Trunk replacement services.

Virtual-Fax ATA:

Fax machines still play a major role in business. With this, the need to support fax machines is very important. Many regulatory and corporate governance initiatives require fax images to be archived for records accountability and tracking. Virtual Fax-ATA provides an easy-to-deploy ATA device that seamlessly integrates with your existing fax machine(s) while enhancing its feature set.

Virtual-Fax ATA Features:

HTTPS with SSL for security

- Super-charge your existing fax machines
- Supports up to 2 FXS ports per ATA
- Email notifications for full unified communications/unified messaging integration
- Archival of fax image for regulatory compliance (HIPAA/SOX)
- Lower bandwidth usage than T.38
- Centralization of all fax traffic for full reporting
- Optional rack appliance can support up to 24 FXS ports for larger installations
